Reflexotherapy Applicator Now Available in the U.S.

A Safe and Pain-Free Self-Treatment Device That Promotes Healing,
Relieves Stress, Tension, Aches and Pains

BETHESDA, Md., Jan. 8 /PRNewswire/ -- Dynamic Pain Relief.Com, a leading provider of alternative self-help treatments and products, announced today its newest offering to Web consumers -- the Reflexotherapy Applicator. This therapeutic device is a safe, pain-free, and drug-free self-treatment product. It is the only product on the market of its kind. This unique device combines all of the benefits of reflexology and acupuncture treatments all in the privacy of one's home and without the worry of any needle penetration.

According to Irene Tamaras, CEO of Dynamic Pain Relief.Com, "the Reflexotherapy Applicator has an extraordinary patented design that when used correctly provides an alternative and complimentary method of self-treatment that promotes healing, relieves stress, tension, aches, and pains." She also added, "another plus is the applicator has no expiration date and does not require batteries or electricity, in fact, the reflexotherapy applicator can be used again and again for less than the cost of one visit to a reflexologist or acupuncturist."

The Reflexotherapy Applicator works by combining pressure (the reflexology part) and acupuncture (but without needles to puncture the skin) by simply lying on the applicator's prickly plastic points or by applying the applicator to the surface area on the body that hurts (i.e. neck, shoulders, upper and lower back, hips, buttocks, thighs, knees, etc.). The Reflexotherapy Applicator's action is based on the science of Reflexology where the skin is stimulated which then activates reactions in the internal system of the body to produce physiological changes that work toward the release of your problem. For more information about Reflexology and the Reflexotherapy Applicator please visit <http://www.dynamicpainrelief.com>

Dynamic Pain Relief.com was founded to help people who suffer with pain and chronic pain. We offer a variety of alternative self-help treatments and products, which are drug-free, affordable, and highly effective for both physical and emotional pain management.
